USE PHONE SAFE AT THE GOLF COURSE

INSPIRATION FOR THE INVENTION:

"I wanted to create a secure way to limit cell phone use for students or workers, so I invented this. My design increases security and convenience when collecting cell phones."

BENEFITS:

- Provides an effective way to control and limit smartphone use at school, home, and any institution where people gather
- Offers an improved alternative to traditional storage units
- Enhances security and peace of mind
- Will help to prevent distractions
- Convenient and easy to use
- Secure and modern design
- Ideal for schools, businesses, restaurants, hospitals, movie theaters, golf/country clubs, the military, households, or any institution with the need for safe storage of personal devices

FEATURES:

- Modified storage safe for mobile devices consists of an insulated storage cabinet or safe with programmable locking doors using a Smart Safe application on the smartphone; features can include a pass code, fingerprint scan, etc.
- The Smart Safe for the schools, or any institution where people gather, will have assigned storage slots for each student or individual phone; can be accessed via a pass-code combination lock etc.; can include charging ports operated by solar panels
- Other features include an alert message system, a UV-light treatment/ disinfectant and is sound and fire proof
- In a school scenario, students can store phones on "airplane mode" within their assigned spots in the cabinet; if their phones are not put away, students will receive a message telling them their phones will be deactivated in 5 minutes unless they are placed in the safe
- The cabinet can then be locked by the teacher/administrator or a set time feature while school is in session; a text alert to the administrator in the event of a break in
- Home version of the Smart Safe can have three pre-drilled holes for USB cords so the user can simultaneously charge a range of devices

- The home version will also have pre-drilled holes for mounting the safe in any night stand, and fastening hardware can be included; the home version will have the measurements of W 12 X D 8.75 X H 4.5 so that it can fit inside any night stand drawer
- The home version will have a modern, sleek design and the door will open on two sides made out of frosted glass; home version interior will be lit with blue LED lighting and will come in a variety of colors ranging from black, white, turquoise blue, pink, etc.
- For restaurant use, customers can pay \$5 to check two phones into two slots (if a restaurant has 50 slots and charges \$2.50 per slot, they can make about \$500 day using this invention from noon to 2:00 PM and 5:00 to 11:00 PM, and about \$15,500/month)
- When the owner of a phone stored in the Smart Safe receives a text message, the sender will receive an automated response telling them the recipient is busy, as well as when the recipient will be available to respond again once dinner is over; the couple dining can access their phones earlier if they contact the administrator/restaurant manager
- At home, parents can program the safe to lock the phone for a certain period of time (for example, 7:00 PM to 7:00 AM) so that their children can get a good night's sleep, which is important for development, etc.
- Optional wristband that notifies the user when the timer is up
- Producing in design variations for commercial and residential use
- More information is available upon request

DEVELOPMENT:

- Patent application in process

MARKETING OUTLETS:

- Wholesalers of security control equipment & systems
- Wholesalers of safes & vaults
- Retailers of cellular telephone equipment & supplies
